

Hi, I'm **Cédric Nolin!**

Web Developer

I am passionate about **technology** and **computers**.
My hobbies are **longboarding**, **music** and **video games**.
I am an **API** and **Linux** lover!

ABOUT ME

FULL NAME

Cédric Nolin

AGE

23

LOCATION

Sherbrooke, Québec, Canada

EMAIL

cedric.nolin.cde@gmail.com

SKILLS

PROFESSIONAL SKILLS

PHP, Laravel, CakePHP, Linux, Git, Javascript, jQuery, Bootstrap, CSS & preprocessors, HTML & templates

WORK EXPERIENCE

QUATORZE COMMUNICATIONS

 **Web Developer & Operations** - Oct 2016 - Current

From managing our clients needs to domains and hosting solutions I am providing our clients the best experience possible. Being part of a team of 5 has made me versatile for **front-end integration** as well as **custom programming** for back-end solutions. Most projects are using frameworks such as **Laravel** or **Qcubed**.

Responsibilities:

- Responsive website integration
- Custom **Intranets solutions**
- Data storage for product inventory
- Web hosting assistance and troubleshooting

QUATRAL SOLUTIONS

 **Web Developer** - *Sept 2014 - May 2016*

I was part of a small team of developers working on many Web applications and Websites using different technologies. I mainly worked on projects using the **CakePHP** framework, themes and plugins for **WordPress** and development of **Owncloud** applications.

Responsibilities:

- **Developing and maintaining** custom applications
- Implementing and using **APIs**
- Updating our system with the open source core
- Issue management and bug testing

SIDE PROJECT

 **WHM Manager (SaaS)** - *Concept*

A management SaaS concept for multiple **WHM servers** to help businesses handle authentication and actions related to **cPanel** accounts.

EDUCATION

PROGRAMMING

 **Collège de l'Estrie (1 year course)** - *Graduation sept 2014*

The programming course I took was Web Oriented, I learned about programming concepts for **PHP**, **C#**, **JavaScript** and **SQL** database development. It also included the Web basics: markup (**HTML**) and styling (**CSS**).

COMPETITION & EVENTS

HACK SHERBROOKE

 **2nd place award** - *Hack Sherbrooke 2015*

Using Open Data from the cities in Québec, we developed a Web Application which creates a list of attractions to travel for vacation. With minimum user interaction, the locations are generated and visualized through a Google Map display showing the most efficient way to navigate throughout your trip! View [winners & our team's project](#) (french content).

MONTREAL LINUX MEET-UPS

Attended multiple Meet-ups in Montréal for various topics such as **devops**, automating, **Vagrant** & **Docker**.
